The OECD has adopted a recommendation to combat bribery. Accordingly, and as provided by Swedish law on bribery etc. in both the public and the private sector, EKN requests that the exporter make the following declaration.

We hereby declare that

Special instructions for completing the form

Item 3 *Goods, services*

For machinery, means of transport, apparatus, instruments and similar, specify the number of each. If such goods constitute a cohesive item of equipment (installation and plant), this must be apparent from the description of the goods. In this case, the number of individual goods does not need to be specifically indicated. If the purchase contract includes spare parts and tools, their percentage proportion of the contract amount must be stated.

Item 5 *Contract amount etc*

Contractual currency refers to the currency – or, where applicable, the currencies – of payment according to the bill(s) of exchange. Use the standard currency codes (SEK, USD, GBP etc)

Item 6 *Terms of payment*

Specify when payment is to be made according to the supply contract, e.g., on or a certain period after conclusion of the contract, on shipment (partial or final), on an average delivery date, on completion of the supply contract etc.

Item 9 *Origin of goods and/or services being part of the export transaction*

Please bear in mind the following points when filling in this item:

- If the export transaction contains manufactured goods and/or services (not components), produced in the exporter's own facilities/operating premises outside Sweden, this should be mentioned, stating the manufacturing country and purchase price (equivalent) for these goods and/or services.
- If the export transaction, in addition to the exporter's own products, also contains manufactured goods and/or services from other companies (manufacturers), Swedish or foreign, this should be mentioned, stating country, company and purchase price for these goods and/or services. If a large number of sub-contractors are engaged, only the main one needs to be stated here. The same applies to export of plant of various kinds, where sub-contractors' equipment and the exporter's own equipment are to form a complete plant.

Item 13 *End user*

EKN's sustainability assessment focuses on the location-specific business activity, operation, or project where the goods and/or services is to be used, the so-called end use. The following questions aim to clarify the end use in the current transaction as far as possible.

- Select the **buyer's business** if the goods and/or services are to be used in an operation, a business or project that the buyer owns, e.g in its own factory, infrastructure project, mine, or other facility. Also select the buyer's business if the buyer resells directly to consumers. Select **other business** e.g. when the buyer is a reseller or contractor to/in other business operation or project.
- Specific business** operation refers to e.g. a mine, a factory or a facility. **Project** refers to a commercial industrial or infrastructure undertaking.

Description of the Business/Project

Example 1: The goods will be used at mine X located in the Y province.

Example 2: The goods will be used at the Y factory located in the city Z.

Example 3: The goods will be used in the construction of the motorway between the city Z and the city ZZ.

Example 4: The goods will be used in the mining sector in the YY region.

The business phase

New Project: Projects refer to the construction of new physical infrastructure and facilities such as factories, roads, mines, railways, tunnels, bridges, electricity grids and water supply systems, as well as the restart of previously active facilities (e.g. a factory or a mine).

Material expansion of existing operations: Expansion refers to a material expansion, capacity increase or other change of existing infrastructure or facility which may result in an increased or changed impact on people and/or the environment during the construction and/or operation phase (e.g. expansion and/or significant capacity increase of a factory or mine).

Existing operations: If the end use is in a business that does not meet the criteria for projects or expansion, state existing business.

e) The specific business where the goods and/or services will be used may be unknown, but please describe what you know such as:

- the goods will be used within the mining sector in country X;
- the services will be used in different businesses in region Y;
- the retailer will sell mostly to industry sector Z;
- the goods consist of spare parts or services to industry sector Z in country X.

f) Industry sectors

This is a list of the industries with high risks that EKN has identified. If you do not find the specific industry, select *Other industry*. Note that it is the end user's industry that is referred to. If, e.g., the buyer is active in transport, but mainly perform services for the mining industry, the sector *Mining and quarries* must be selected.

- Agriculture, animal husbandry, forestry
- Chemical industry
- Food and beverage processing
- Information and communications technology, surveillance
- Infrastructure and construction
- Manufacturing pulp and paper
- Military, coast guard
- Mining and quarries
- Oil and gas extraction, petrochemical industry
- Power generation, fossil energy (coal, oil, gas)
- Power generation, renewable energy (wind, sun, hydro, biofuels)
- Power transmission including substations
- Shipyards and shipbuilding
- Steel industry
- Textile industry
- Waste management
- Water treatment and water supply

EKN is very restrictive in issuing guarantees for fossil fuel operations. Read more in EKN's sustainability policy. The Appendix 1 clarifies EKN's approach to guarantees for applications which in different ways relate to fossil fuels and clarifies which sectors and businesses EKN does not issue guarantees for.

g) Answer yes if the buyer/end-user is operating in the coal, oil or gas sector.

Describe how there is a risk that the goods and/or services may be used in the fossil fuel sector, e.g. if the buyer is active in coal, oil or gas or if the buyer redistributes the goods and/or services to end users in these sectors.

Item 14 *Environmental matters*

These questions also include information about business operations connected to the new project and necessary for the project development. Examples of connected business operations: a new harbour built in connection with a new mining project; forest areas that supply a new pulp mill with raw material; new roads built to a new industrial project (these businesses are not necessarily connected geographically to the new project).

- a-b) Examples: Impact on climate, air, water, land, resource consumption, biodiversity, sensitive natural areas and the impact of environmental effects on people and communities.
- c) Sensitive natural areas include, for example, national parks and other protected areas according to national or international law and sensitive natural areas such as wetlands, areas with high biodiversity and / or endangered species. Sensitive natural areas also refer to historical / cultural monuments as well as important areas for indigenous peoples or other vulnerable groups.
- d) For example: exports of products that reduce the impact on the climate, contributions to the UN's sustainability goals (Agenda 2030).

Item 15 *Social matters*

- a) Examples: Risk of child labour, forced labour, discrimination, health and safety, as well as the right to freedom of association and collective bargaining, but also the companies' influence on health and safety in the local area, relocation, indigenous people, cultural areas and freedom on the Internet.
- b) Examples: Pose a serious risk to or has a serious impact on human rights with particularly grave effects (child labour, forced labour, trafficking in human beings, threats to life), widespread (large-scale migration or working conditions in a sector), cannot be restored (torture, loss of health, loss of indigenous people) or is related to the project site (conflict or post-conflict areas).
- c) Examples: exports of products that increase the number of jobs, contributions to the UN's sustainability goals (Agenda 2030) and freedom on the net.

Item 16 *Debarment*

The question on debarment concerns not only the exporter, but also anyone acting on behalf of the exporter and any group company involved. This means enterprises belonging to the same group as the exporter that have been involved in the contract negotiations or otherwise been involved in the negotiations with the buyer.

Item 17 *Agents*

The term agent means anyone acting on behalf of the exporter.

Item 18 *Under charge/convicted or notice served of a suspicion of crime*

Note that, with regard to under charge or conviction, not only the exporter as a legal person is covered by this question; it also concerns the exporter's employees, employees of any group company involved or anyone else acting on behalf of the exporter.

The question on knowledge if any of notice of suspicion of criminal act refers to any other natural or legal person than the exporter in its capacity as a legal person.

Item 19 *Cooperation with other suppliers*

If the contract is concluded by a consortium including one or more foreign enterprises, or if similar cooperation occurs with enterprises abroad, the form of the cooperation should be stated here, along with the names of the enterprises, their home countries and their stake in the transaction. If the exporter is a sub-contractor of an enterprise in a third country, detailed information of the main contractor and its contract with the end buyer should be provided here.
